Automated Draft Invoice Generation System

Zoho Books **Purchase-to-Sale Draft Invoice Automation** — Draft Sales Invoices will be generated automatically based on weighbridge and dispatch data as soon as the truck is loaded.

Presented by: Amit Kasnia

Core Requirement & System Vision

Core Automation Goal

After truck loading in the steel business, **Draft Sales Invoices in Zoho Books** should be automatically generated as soon as weighbridge and dispatch data become available.

Architecture Constraint

Sales Invoices in Zoho Books are not created in isolation — association with **Purchase Bill + Customer PO Project** is mandatory.

Strict Automation Boundary

The system will create bills only up to the **Draft State (status = draft)**. E-Invoice, E-Way Bill, and digital signatures will be handled manually by the accountant.

Input Data Package — Dispatch Group

When the truck is loaded, the Dispatch Team sends a complete package of 5 documents in the **WhatsApp Dispatch Group**:

Vendor Purchase Bill

Purchase invoice sent by the vendor

Weighment Slip

Net weight slip

Lorry Receipt (LR)

Transporter / consignment copy

Customer Purchase Order

Customer's agreed sales rate and terms

WhatsApp Message

Dispatch details in the standard template format

WhatsApp Standard Message Template

Standard Dispatch Message Format

Purchase From : [Vendor Name]
 Sale To : [Customer Name]
 Delivery As Per : PO-[PO Number]
 DO : [Delivery Order] | SO :
 [Sales Officer]
 Grade : [Steel Grade] | Size :
 [Material Size]
 Weight (kg) : [Net Weight in Kg]
 Vehicle No : [Truck Number] |
 Driver : [Driver Phone]
 Transport : [Transporter Name]
 Dispatch : [Dispatch Location]

- ❏ This template is the primary data source for the automation script — all fields must be structured and complete.

Zoho Books Project Setup

When a Customer PO arrives, first **create the project** so purchase and sales inventory stay in sync.

Always use the **Customer PO number** for the project name (for example, PO-98765). In Billing Method, selecting **Fixed Cost for Project** is mandatory — this is what links purchase and sales.

Purchase Bill Entry & Account Tagging

Header & Transport Fields

- Vendor Name, Bill Number, E-Way Bill, Bill Date
- Custom Fields: DC To, Sale To, Vehicle Number, LR Number

Line Item Rules — CRITICAL

- Account Category: **Inventory Asset** (strictly)
- PCS & Quantity: Net Weight / Pieces
- Rate + **18% GST**, TDS 0.1% deduct
- Customer select → **Billable checkbox** → Project tag

Mandatory Admin Approval Gatekeeper

1

Accountant Submits

Purchase Bill submit → Status: **Pending Approval**

2

Admin Audit

GSTR-2B verification, GST split check, 0.1% TDS confirm

3

Admin Approves

System enables billing once the bill is approved

4

Create Invoice

Three-dot menu → **Create Invoice** option active

⚠ System Gate Rule: Without admin approval, Zoho Books does not allow billable expenses to be linked or an automated invoice to be triggered.

Auto-Draft Sales Invoice — Field Mapping

Approved Purchase Bill clicking **Three Dots** → **Create Invoice** will automatically fetch and map:

Invoice Field	Source Data	Mapping Logic
Customer Name & Address	Customer PO Master	Auto-populated from linked project
Order Number	Customer PO	Format: [PO Number] - [PO Date]
Salesperson Name	WhatsApp Template (SO)	Mapped from Sales Officer Name
Destination	WhatsApp / PO	City - State (e.g., Gandhinagar - Gujarat)
Vehicle & Driver No	Weight Slip & WhatsApp	Vehicle Number & Driver Contact
LR No & Transporter	LR Copy & WhatsApp	LR Number & Transporter Name
Dispatch Through	Standard Rule	Fixed Value: By Road
Purchase Details	Purchase Bill Header	Vendor Name, Bill No, Purchase Weight

Rate Override & Save as Draft

Critical Rate Override Rule

Zoho Books default **Purchase Rate** is carried into the Sales Invoice.

Developer/System must **OVERRIDE the Purchase Rate with the Customer PO agreed Selling Rate.**

Final Audit Checklist

- Item Description, PCS, Weight — auto-carry from purchase entry
- Match **Weight** and **Vehicle Number** against the Weight Slip
- Selling Rate = Customer PO Agreed Rate (confirm override)
- **Save as Draft** click — status = draft

 After saving as draft, the accountant will manually complete E-Invoice, E-Way Bill, and Digital Signature.

End-to-End Workflow Summary

This 6-step workflow shows the full automated pipeline from steel dispatch to a draft invoice in Zoho Books — human intervention is limited to admin approval and post-draft compliance.

Automation Scope

Through draft invoice generation — status = draft

Manual Scope

Rate verification, E-Invoice, E-Way Bill, digital signatures

Key Constraint

No invoice trigger without admin approval
